**Lanex, LLC awarded Church of Christ Web re-design project**

BROOKFIELD, Wis., April 18, 2008 - Lanex, LLC, a Brookfield, Wis. based Internet and software development company, has been awarded a Web redesign project for the Churches of Christ, organized by the church of Christ in Jacksonville, Ala. The new site will bring together several online properties into a robust, cutting-edge content management system. These include Polishing the Pulpit, a site featuring an annual Churches of Christ leadership conference; "House to House," a publication with a subscriber base of 2.7 million people; and a large Churches of Christ informational site.

The site will be highly interactive, and involve Churches of Christ site users through features such as an interactive Bible search, topical references, email-a-friend, verse-a-day and send-a-postcard capabilities. Administrative tools that will also allow select users to update and manage various aspects of the Churches of Christ site to maintain fresh content and style.

The site will also showcase the extensive library of audio, video and tracts maintained by Churches of Christ.

"The Churches of Christ discovered Lanex through our 2007 GDUSA graphics design award. Through implementation of cutting-edge technology, and utilizing strong design and usability skills, we will be able to assist Churches of Christ in not only the integration of a number of present sites, but in their ability to deliver the Gospel message to a broad and diverse group of people."

For further information, visit the Lanex Web site at [www.lanex.com](http://www.lanex.com), or [housetohouse.com](http://housetohouse.com)

Founded by partners Matthew McCoy and Herb Guenther, Lanex has built a reputation for providing skilled Web and eCommerce development, timely project delivery and attentive customer service.

Lanex currently employs a staff of nine, including specialists in web development, application development, interface design and multimedia, network administration and systems integration.
